

YouTube, Vevo or Vimeo Videos ONLY: Easy for the Broadcasters, Perfect for the Judges

We're not trying to make things difficult, but here are the 4 (+2) main reasons

1. Our embedded player strips out all advertising and playlists
2. It loads in 1-3 seconds (websites typically take a lot longer and has pop up ads and other auto feeds)
3. Everyone's video plays back in the same player and has the same surrounding
4. The Awards Show Producers have direct access to winning media.
5. Using your stations website takes the judges out of Best in Media and requires them to back up several steps to get to the next entry and could cause their judging level log in to break.

The biggest reasons for the spirit of competition is to keep the judging process as even as possible. The surrounding of your webpage can influence the judge as they view your video as opposed to a station that has a less fancy site. Let's keep the playing field LEVEL.

...and it those are enough reasons, failure to follow these simple requirements could eliminate your entry without any further notice
